# What is the IRENA Green Energy Coin Project?

While traveling with your electric car, you will also be able to mine IGE tokens with the IRENA Green App that you will download to your vehicle. All you have to do is travel. At the same time, you will be able to mine IGE tokens with the environmentally friendly electricity you obtain only from solar energy, with the solar panels you will purchase from our business partners, which are compatible with our IR-APOLLON Mining device. Each 1024 IGE tokens will be equal to 1 IRENA token. In the 3rd quarter of our road plan, you will be able to buy solar

panels that we produce ourselves as IRENA Green Energy Company from our online market with IRENA token.

Our Vision

Green Energy, also known as $IRENA is a community-driven deflationary token with many future projects and partnerships designed to raise awareness of the current state of the planet as well as the critical importance of harnessing renewable energy for use in our daily lives.
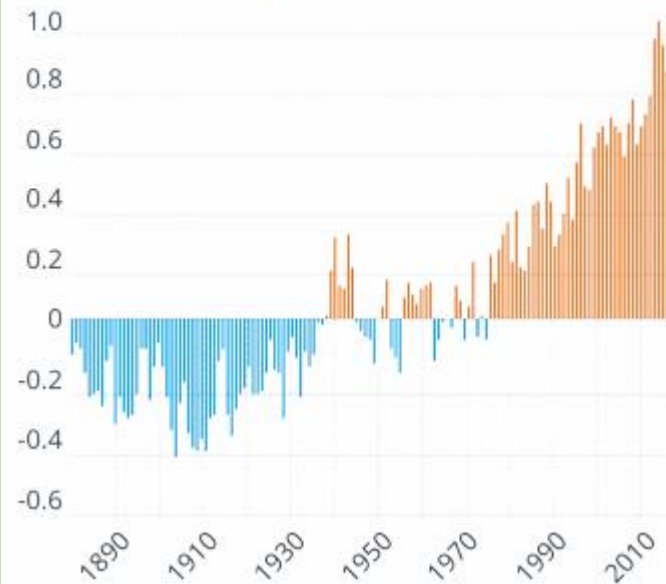

Safe Energy aims to create one of the largest and strongest communities, which will not only be well educated when it comes to the climate change crisis and how it effects our planet but also how we, as a community can fight against it.

Safe energy takes much inspiration from charities like Greenpeace and as a result will act in a similar fashion but in the crypto space. Safe energy will organize charity events with the ultimate goal of reducing our total carbon footprint These charity events will include working with various to establish tree planting schemes, as well as partnering with companies who create the equipment used to produce renewable energy in order to promote the adoption and usage of renewable energy.
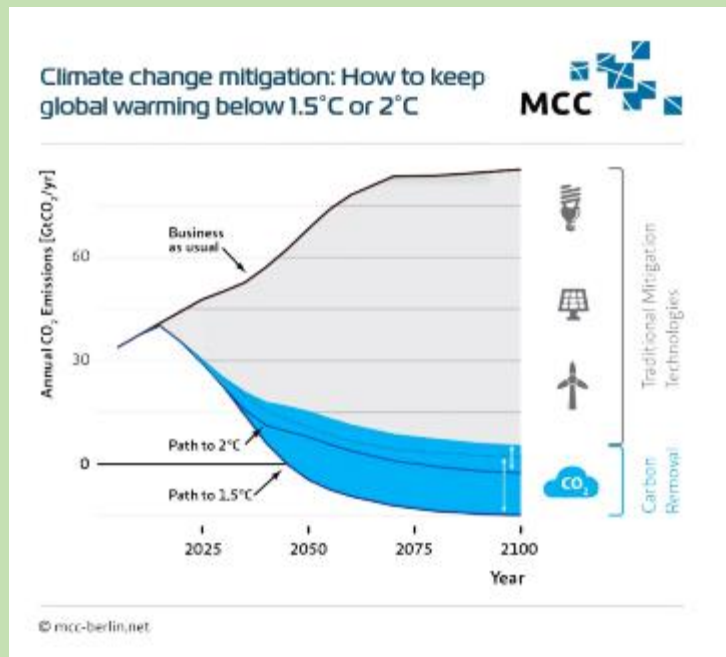

WHAT IS THE PURPOSE OF SAFE ENERGY

Temperature anomalies, 1880-2019

Global land and ocean temperature anomalies in degrees Celsius based on average temperature for the 20th century

Our total carbon footprint is only getting more and more severe as the effects of our current carbon-based fuel sources continue to wreak havoc on the Earth. The interest and adoption of carbon neutral energy sources such as solar, wind, tidal and geothermal is growing at a steady rate, with this comes the ever-increasing need of these renewable energy sources if we are to create a better future for us all.

Climate change mitigation: How to keep global warming below 1.5°C or 2°C

As the name Safe Energy suggests, we are absolutely determined and extremely motivated when it comes to renewable energy sources and have made it our goal to spread awareness, invest into and support them in any way we can in order to create a greener planet for future generations.

TOKENOMICS

51%	10%	10%	5%	24%
Coin Burn	PancakeSwap Liquid	Angel Investor	Developer Green Team	Marketing

The other 1% is distributed to all IRENA token holders in the form of static rewards, also known as reflections.

IRENA GREEN ENERGY COIN ROADMAP

PHASE 1

 • *Hiring and building the core team.*
 • *Planning and development of Green Energy.*
• *Establishing our targets & milestones.*
• *Creating our Social Media platforms (Twitter,Telegram, Discord, etc.)*
• *Contract release and PancakeSwap listing.*
• *Contract approval and BSCScan confirmation.*
• *First CEX listing.*
• *Team wallets and marketing wallets locked.*
• *IRENA Coin will be burned.*

PHASE 2

• *CoinGecko and Coinmarketcap listings.*
• *First partnerships with other crypto projects.*
• *Nomics listing, First audit.*
• *Trustwallet and Safepal wallet logo and price updates.*
• *Aggressive marketing campaigns on all social platforms.*
• *IRENA Coin will be burned.*

PHASE 3

• *First partnership with renewable energy machinery company.*

- *Sale and delivery of IR-APOLLON mining system.*
- *The IRENA Green App will be used.*
- *Professional marketing agency co-operation.*
- *First charity event.*
- *The IR-APOLLON mining device will be available for sale.*
- *Expanding the core team and doxing all members.*
- *IRENA Coin will be burned.*

PHASE 4

- *Influencer marketing*
- *Begin environmental projects within the community*
- *Merchandise marketing and release*
- *Guerrilla marketing campaign*
- *100K Hodlers and community growth*
- *Second charity event*
- *IGE Green software can be downloaded to electric cars.*
- *IRENA COIN eco-system plan and development*
- *Viral marketing*
- *IRENA Coin will be burned.*
